

Modules Akazie Wood 2.0 template

General usage

We use modules that stack next to each other. So far we have used bootstrap sizing. Every module is an `<article>` and has a certain width. For example, Full Width has `<article class="col-12 col-md-12">`. This makes mobile queries easier. For example, a half-width module would be `<article class="col-12 col-md-6">` so that it switches to 100% width when viewed on mobile.

So for example on a page we might have a full-width intro text, three images that are 1/3 width each and an outro text that's full width. (We can select the width in the settings of every module).

Grav would then generate something like this:

```
<article class="text col-12 col-md-12">Text</article>
<article class="image col-12 col-md-4">image</article>
<article class="image col-12 col-md-4">image</article>
<article class="image col-12 col-md-4">image</article>
<article class="text col-12 col-md-12">Text</article>
```

The bootstrap approach also helps us keep user errors to a minimum. If for example the user would select 1/4th width for the third image, the outro text would still be on a new line.

Every module except full-width modules should have a width selection:

full width: `col-12 col-md-12` 2/3 width (full-width mobile): `col-12 col-md-8`

1/2 width (full-width mobile): `col-12 col-md-6`

1/3 width (full-width mobile): `col-12 col-md-4`

1/4 width (half-width mobile): `col-6 col-md-3`

1/6 width (1/3 width mobile): `col-4 col-md-2`

Let us know if you have any better ideas!

A detailed description of every module

1. Module hero section

Backend content tab

- Title *
- Subtitle
- Markdown TextBox
- Insert button (Linktext, link, open in a new tab (yes/no))
- Insert link with Icon (link text, link, open in new tab (yes/no), upload icon)
- Insert image/video
- Set the color of the square in the Background

Backend settings tab

- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

2. Module logos

Backend content tab

- Title *
- Subtitle
- Insert a repeating field for each logo
 - o Name (is also the alt-tag)
 - o choose logo/image
 - o add link
 - o open new tab (y/n))

Backend settings tab

- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

Animation

- On hover – the logo box gets slightly bigger if there is an inserted link

3. Module image

Backend content tab

- Title *
- Subtitle
- Alt tag *
- Image upload
- Image description

Backend settings tab

- Module width (full width/two third/half/quarter)
- Image format
 - o Landscape 1 (4:3)
 - o Landscape 2 (16:9)
 - o Landscape 3 (2.35:1)
 - o Square (1:1)
 - o Portrait (3:4)
- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Sort modules (change order)
- Set module visibility (visible, hidden)

4. Module text

Backend content tab

- Title *
- Subtitle
- Markdown textbox
- File upload (pdf, image, etc.)
- Insert button (Linktext, link, open in a new tab (yes/no))

Backend settings tab

- Module width (full width/two third/half/quarter)
- Text alignment (left/center/right)
- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Text color
- Sort modules (change order)
- Set module visibility (visible, hidden)

5. Module icon list

Backend content tab

- Title *
- Subtitle
- File Upload
- Add a repeating field for each entry
 - o Select icon
 - o Alt-tag
 - o Title
 - o Text
 - o button text
 - o button link
 - o new tab (yes/no)

Backend settings tab

- Icon boxes per line (2, 3, 4, 5)

- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

Important note

- Minimum required icon boxes: 1

6. Module posts

Backend content tab

- Title *
- Subtitle
- Markdown TextBox
- Image upload
- Insert a link (link, link text, open new tab y/n)

Backend settings tab

- Module/post width (full/half/third/quarter)
- Show title (yes/no/placeholder)
- Show images (yes/no)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

Animation

- Arrow moves a little bit to the right, as soon as there is a hover on the post

Important

The module posts and portfolio are modules that contain posts (of post type post or portfolio) that can be added through the grav ,add post' UI. This gives us the possibility to access individual blog posts or portfolio posts via URL later.

7. Module call to action

Backend content tab

- Title *
- Subtitle
- Markdown TextBox
- Insert button (link, link text, open new tab y/n)
- Icon Upload
- Optional repeating field for 1-2 small teasers
 - o Select icon
 - o Title
 - o Text
 - o Link
 - o Link Text
 - o Open in a new tab? (yes/no)

Backend settings tab

- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

Animation

- Arrow moves a little bit to the right, as soon as there is a hover on the teaser

8. Module portfolio

Backend content tab

- Title *
- Subtitle
- File Upload
- Select icon
- Select image
- Insert a link (link, open new tab y/n)

Backend settings tab

- Width (half/third)
- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

Animation

- If a link is set, the image gets slightly bigger on hover

Important

The module posts and portfolio are modules that contain posts (of post type post or portfolio) that can be added through the grav ,add post' UI. This gives us the possibility to access individual blog posts or portfolio posts via URL later.

9. Module pricing

Backend content tab

- Title *
- Subtitle
- Markdown Textbox
- File Upload
- Add a repeating field for each entry
 - o Insert Price/Number
 - o Select icon
 - o Text
 - o button text

- button link
- new tab (yes/no)

Backend settings tab

- Set the color of the number/price
- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

10. Module spacer

Backend content tab

- Height in px

Backend settings tab

- Set module background color (choose between full width/content width)
- Insert background image (choose between full width/content width)
- Sort modules (change order)
- Set module visibility (visible, hidden)

11. Module team

Backend content tab

- Title *
- Subtitle
- File Upload
- Repeating field for each team member
 - Select image
 - Text (position)
 - Text (name)*
 - E-Mail
 - LinkedIn-link
 - Phone-Number
 - Additional Text

Backend settings tab

- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Sort modules (change order)
- Set module visibility (visible, hidden)

12. Module contact

Backend content tab

- Title *
- Subtitle

- Markdown Textbox
- Insert Map embed code

Backend settings tab

- Hide map (yes/no)
- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

13. Module accordion

Backend content tab

- Title *
- Add a repeating field for each question
 - o Question title
 - o Question answer
 - o Link
 - o Link text
 - o Open in a new tab (yes/no)

Backend settings tab

- Hide map (yes/no)
- Show title (yes/no/placeholder)
- Change font-size title & subtitle
- Background Color
- Background Image
- Sort modules (change order)
- Set module visibility (visible, hidden)

Animation

- Standard state – the answer is hidden
- Click on the Title triggers content text to expand below

Footer

The footer should look the same on every page so it would be better to put all the footer settings in the theme settings.

- Link Impressum
- Link Datenschutz
- Link AGB
- Copyright Text

To insert the main footer content (the four columns), we could work with repeating fields with different widths like the modules (1/3 width, 1/4 width, 1/6 width, etc.). Every repeating field should have a title and a textbox + the possibility to select the width.
